NOTICE OF PROPOSED ACTION

Public Notice - Web Posting - 022312

Pursuant to Nevada Revised Statutes (NRS) Chapter 445B and the Nevada Administrative Code (NAC) Chapter 445B, the Division of Environmental Protection is issuing the following notice.

The Administrator has received an application for a Phase-2 Nevada Mercury Operating Permit to Construct from the following applicant:

Antler Peak Gold Inc.
P.O. Box 2610
Winnemucca, NV 89446

The Administrator has prepared tentative determinations regarding the modified Mercury Operating Permit to Construct (MOPTC) AP1041-2248 that, in brief, affect the following sources: (1) carbon kiln, (1) pregnant tank, (1) barren tank, (2) retorts, (1) furnace, and electrowinning cells.

The draft MOPTC proposes mercury emissions performance standards and mercury emissions control technologies determined to be NvMACT pursuant to NAC 445B.3683.2(b). Determination of proposed NvMACT mercury emissions final control technology for all units is a carbon deep bed scrubber.

The tentative MOPTC activities include monitoring, recordkeeping, annual stack testing for mercury emissions, annual emissions reporting, annual mercury co-product reporting, limits of operation, and work practice standards which minimize emissions of mercury to the atmosphere. Other permit contents include a mercury emission limit for the carbon kiln, pregnant tank, barren tank, retorts, furnace, and electrowinning cells.

On the basis of the preliminary review and the requirements of the NRS and the NAC, the Administrator is hereby announcing his intent to issue the modified Mercury Operating Permit to Construct based on review of the information, as proposed. A copy of the draft operating permit is available for public inspection at:
